

Code:

```
#include <stdio.h> #include <stdlib.h>

struct node { int data; struct node *next; };

typedef struct node node; node *start = NULL; int n, p_val;

void create() { node *tail = NULL; int i; for(i=0;i<n;i++) { int val; scanf("%d", &val); node
*temp = (node*)malloc(sizeof(node)); temp->data = val; temp->next = NULL; if (start ==
NULL) { start = temp; tail = temp; } else { tail->next = temp; tail = temp; }}}

void del() { node *p1 = start; int found = 0; while (p1 != NULL) { if (p1->data == p_val)
{ found = 1; break; } p1=p1->next; }

if (found) {
    while (start != p1) {
        node *temp = start;
        start = start->next;
        free(temp);
    }
    printf("Linked List:");
    node *curr = start;
    while (curr != NULL) {
        printf("->%d", curr->data);
        curr = curr->next;
    }
    printf("\n");
} else {
    printf("Invalid Node! Linked List:");
    node *curr = start;
    while (curr != NULL) {
        printf("->%d", curr->data);
        curr = curr->next;
    }
    printf("\n");
}

}

int main() { if (scanf("%d", &n) != 1) return 0; create(); scanf("%d", &p_val); del(); return
0; }
```

Input:

4
9 77 12 6
12

Output:

Linked List:->12->6
